

## Pilegårdsvej 22- 58

### **Help prevent rats and to keep the outside areas nice and clean.**

Unfortunately, some residents do not sort their waste. This is necessary if we want to have the waste collected. The garbage will not be collected if the containers are not able to close. In addition, the birds pull out the waste and leave it on the ground to the rats.

Therefore ... **Please make sure that no waste is spilled around the outside containers and please use the next container if one of the containers is full.**

### **Sorting in our room for bulky waste**

It is mandatory to sort reusable materials.

Unsorted and illegal waste is thrown into the garbage room. This is not okay and has to end.

- Cardboard boxes must be folded - without flamingo, paper etc.
- Large combustible is only for furniture etc.
- Bottles should be thrown in the bottle containers – just outside the room to the right.

### **Construction waste**

Paint, kitchen cabinets, chemicals and other construction waste do not belong in the large garbage room. **This should be delivered at the recycling station at “Turbinevej, 10, 2860 Søborg”.**

### **Waste sorting is required**

## **Ventilate the valves**

Friday (2. February), there has been a leakage in the central heating system.

Top floor apartments must ventilate the valves in order to reduce air in the central heating system.

Have a towel ready when you loosen the valve. Make sure all air is released and make sure the valve is closed tightly afterwards.

The last sequence should be repeated over the coming weeks.

You are welcome to contact Thomas our handyman if you need help!
